-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 2-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6 and 9-10 of U.S. Patent No. 6747963. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Regarding claims 2 and 5, the claim 6 of the patent discloses a method for transmitting for transmitting control information in a mobile station of a mobile communication system which transmits the control information filled in a frame on a dedicated physical control channel, the frame being divided into a plurality of slots, the method comprising the steps of determining whether there is dedicated physical data channel data to transmit to a base station (Col. 24, lines 1-3); and gating transmission of the control information in a partial duration of a predetermined one of the slots of the dedicated physical control channel when there is no dedicated physical data channel data to transmit for a predetermined time (Col. 24, lines 4-7).

Regarding claims 3-4 and 6, the claims 9-10 of the patent discloses the control information includes pilot symbols, transport format combination indicator (TFCI) bits, and

feedback information (FBI) bits for a phase difference between at least two transmit diversity antennas used by the base station.
